# BOSâNOVAWeb

iSeries TN5250 web browser emulation

Your Next Connection

**Now** your iSeries can be upgraded to enable full web benefits  
Through the best iSeries emulation available  
**BOSâNOVAWeb** measurably extends the  
life cycle and capabilities  
of your iSeries.

# BOSâNOVAWeb

**Slashes communication costs**

**Ensures a friendly, transparent work environment**

**Installs rapidly and easily without a client install**

**Delivers a very fast ROI**

**GAIN** central management and control

**SAVE** through a web management interface

**REDUCE** maintenance at workstation

**PROVIDE SECURE** access to iSeries for remote web users with SSL

**PRINT** via the web

**DEPLOY** Proxy for customization to your network

**ALIGN** easily into the existing enterprise network architecture

## Add up the advantages

### Centralized

Loaded on a central server and managed by a network supervisor, BOSâNOVAWeb allows normal user changes to occur hassle-free. Whether you are moving users to new workstations, upgrading software, pushing out new applications, or enhancing security, users simply log on to receive the correct workstation parameters for their jobs.

### Web Network Supervisor

The server and users are managed easily and economically via the browser. The Network Supervisor can change or modify parameters from any enterprise computer whether internal or external. No need to use the server's computer for changes or upgrades. It is all done seamlessly via the web and from a remote workstation.

### Zero maintenance

Application upgrades and parameter changes are automatically delivered to end-users as soon as they log on via the browser to the web server integrated into BOSâNOVAWeb.

BOSâNOVAWeb eliminates the need for both additional "push" software and expensive technical support at the desktop. What's more, the client/server architecture means current cache capabilities can be used, thus enabling upgrades in real-time.

### Total Security

The architecture allows all internal and external iSeries users to benefit from the network. Users access the iSeries through the BOSâNOVAWeb server which incorporates a web server. The server encodes all transmitted information, complying with SSL standards, amplified by user verification via a client certificate.

### Printing via the Web

BOS's successful Printer Client technology is embedded in BOSâNOVAWeb to enable you to print via the web. Fully supports all printouts and printers.

### Multi Environments

BOSâNOVAWeb can be installed in tree environments: iSeries Native, Microsoft, Linux.
