

Overview

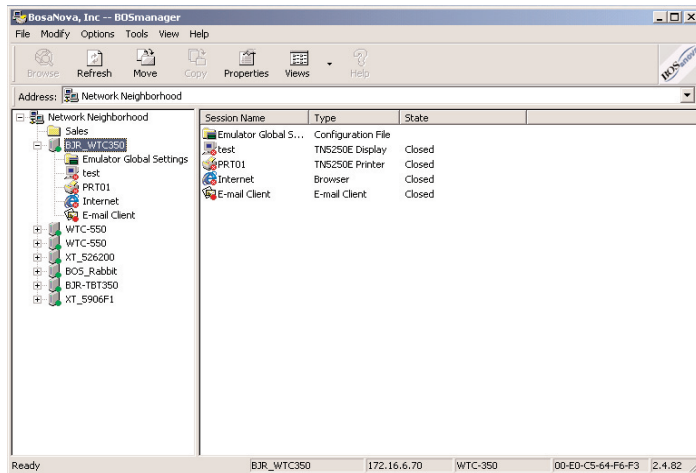

The RBT Series delivers on the promise of increased performance and low cost in a compact package. Assembled in the USA, the RBT Series weighs just over 11lb allowing you flexible mounting options and lower shipping costs. The robust and fan-less construction allows for quiet and reliable operation.

The high speed VIA Eden 400MHz processor provides users with exceptional performance and low power consumption within a small footprint.

Enterprise Class Remote Administration

The RBT-470 Thin Client is simple to configure either locally or remotely using the BOSmanager, which enables the following tasks:

- Complete terminal configuration from a central location
- User lock-out from configuration changes
- Scheduling of firmware updates
- Cloning of user environments
- Control over which applications run on a particular terminal

Benefits:

- Industry standard OS (CE 5.0 Pro)
- Small form factor for space-saving, desktop and mounted deployments
- 802.11 b/g wireless ready
- Kensington security lock slot for enhanced security
- SNMP based management software included at no charge
- 3-year advance exchange warranty

The RBT Series are 200% faster, 30% smaller, consume less than half the power and run 30 degrees cooler than the other "Mini" or Turtle shell type thin clients!
