

4400 Series Thin Client for Dumb Terminal Replacement (DTR)

Value Class

Model Number: 4400

Industry Leading VDI Performance

The 10ZiG 4400 Series Thin Client is optimized to work as the perfect green screen replacement, while enhancing the user experience by the additional functionality afforded by the Thin Client. These Thin Clients – often turned into Ethernet Terminals – include a combination of high 5250 performance and the flexibility to connect to an existing or future MS Terminal Services/Citrix Server. This allows access to additional published applications as needed, creating a "Future Proof" environment for your organization, therefore eliminating the need for premature hardware refreshes at the desktop level.

The 10ZiG 4400 Series Thin Client support four modes of operation: Desktop Mode, WBT Mode, Kiosk Mode and TBT Mode.

▶ Intel 1.33 GHz Dual Core Processor
▶ 1 x DVI-D & 1 x DVI-I
▶ 4 x USB Ports (1 x USB 3.0)
▶ PCI Compliant 5250
▶ Optional Wireless
▶ Optional VESA Mounting
▶ TN5250e / TN3270e with Split Screen
▶ FREE Endpoint Management via The 10ZiG Manager™
