## NOS™

Tech & Firmware Notification

NOS™-64 - 16.1.24

February 2nd, 2021

---

## Known Limitations

Attempts to upgrade from NOS-32 to NOS-64 can sometimes result in an endpoint failing to reboot due to upgrade failure. This can occur in extreme / poor networking conditions where clients are connected remotely via Cloud Connector. A hotfix is privately available on request for such scenario (16.1.24.1) and customer's may request this via our Technical Support Support teams referenced below.

NOS-64-V – USB based virtual printing is supported via VMware Integrated Printing only. This requires customer's running Horizon 8 agent (2006 or later) to ensure they have selected the "VMware Integrated Printing" feature during installation. For customer's running earlier versions of Horizon Agent, ensure that "VMware Integrated Printing" is enabled and not "Virtual Printing". General NOS-64 16.1.24 Release Notes.

## General Release Notes

### Client Versions

VMware: Horizon client 2006, Zoom plugin for VMware 5.4

Citrix: Workspace 2009 (20.09.0.15), RTME 2.9, Zoom plugin for Citrix 5.4
