Client Versions

90Meter – 3.0.0.15

(Available via Add-on for NOS-64 V only)

AVD 1.1.1

Based on MS RDCore SDK Dec 2021

Citrix Workspace App 2202

Cisco Webex (Teams) Plugin - 42.4.1.22472 / 42.6.0.22645 / 42.8.0.23214

(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware addon)

Cisco Webex Meetings Plugin - 41.8.4.11 / 41.10.1.18 / 42.5.5.9 / 42.10.0.149

(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware addon)

Cisco JVDI Plugin - 14.0.0.305549

(Available via Add-on)

Firefox - 91.7.1 ESR

FreeRDP 2.0.0.19

Liquidware – v6.6.0-4

(Available via Add-on)

VMware Horizon Client 2111.1

Fixes problem with sticky keys in VMware Client

Zoom VDI 5.9.6

Notes

Cisco Webex & Cisco Webex Meetings are no longer included in default firmware due to the number of versions available and overall size. These are now available via a combined single Firmware addon upon request to 10ZiG Support and installable via 10ZiG Manager.

Feature Requests

SCEP: Use 'Hostname' variable as Identity string for wpa_supPLICANT.

Add support for log download capability via 10ZiG Manager.

Note: Requires v5.0.2.0 or higher of 10ZiG Manager

Disable 2 stage upgrade when upgrading from NOS-32 to NOS-64.

Bug Fixes

Continued...

HDMI monitor mixed up sound options in drop down menu.

SCEP - Automatic certificate enrollment at first boot wasn't functional following Template apply.

Log-collector - Added wpa_supplicant.log and wpa_supplicant.conf files

Unpack/install PFX formatted certificates.

Analog audio broken on 6148 where HDMI connected.

Citrix NOS-64 C 16.3.32 Release Notes

Client Versions

Citrix Workspace App 2202

Cisco Webex (Teams) Plugin - 42.4.1.22472 / 42.6.0.22645 / 42.8.0.23214
(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware add-on)

Cisco Webex Meetings Plugin - 41.8.4.11 / 41.10.1.18 / 42.5.5.9 / 42.10.0.149
(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware add-on)

Cisco JVDI Plugin - 14.0.0.305549
(Available via Add-on)

Firefox - 91.7.1 ESR

Liquidware – v6.6.0-4
(Available via Add-on)

Zoom VDI 5.9.6

Known Limitations

n/a

Feature Requests

Add option to disable Citrix auto receiver detect, disable pocket extension in Firefox.

Annoyance

n/a

Bug

'Enable Force URL' option connected wrong URL.

Control Panel > Citrix Settings > Workspace WebAPI/PNAgent > Debug log not working.

Continued...

Launchpad GUI corruption when switching connection type from Receiver Web to WebAPI.

Unable to launch multiple Citrix URLs.

VMware NOS-64 V 16.3.32 Release Notes

Client Versions

90Meter – 3.0.0.15

Cisco Webex (Teams) Plugin - 42.4.1.22472 / 42.6.0.22645 / 42.8.0.23214
(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware addon)

Cisco Webex Meetings Plugin - 41.8.4.11 / 41.10.1.18 / 42.5.5.9 / 42.10.0.149
(Available as a combined Cisco Webex (Teams) and Webex Meetings Firmware addon)

Cisco JVDI Plugin - 14.0.0.305549
(Available via Add-on)

Firefox - 91.7.1 ESR

FreeRDP 2.0.0.19

Liquidware – v6.6.0-4
(Available via Add-on)

VMware Horizon Client 2111.1
Fixes problem with sticky keys in VMware Client

Zoom VDI 5.9.6

Known Limitations

In rare cases on the 6048qv and in combination with specific monitors (Dell U2722D) & display scaling in use, this can lead to an eventual crash of the VMware Client and Xorg process which results in the 10ZiG Login screen being displayed. This is part of an ongoing investigation and effected customers can contact 10ZiG Support for more information.

Feature Requests

Add Scaling and desktop Sync options to VMware Advanced settings.
