Tech & Firmware Notification

PeakOS™ / RepurpOS™ / NOS™ - v16.5.36

October 11, 2023

16.5 is our new release based on Ubuntu 22.04 and Kernel 6.3.7. This is supportive of the XML based GUI as per the 16.4 branch and existing customer's running 16.4.x at this time can upgrade to 16.5.x to take advantage of the newer branch and feature set. As per the known limitations upgrades from 16.3.x at this time are not supported and will be made available in a subsequent hotfix.

10ZiG Manager version 5.2.0.2 is recommended for use with firmware 16.5.36
