Liquidware & 10ZiG:

Combining Liquidware Stratusphere UX™ & secure 10ZiG® Thin & Zero Client endpoints provides a powerful solution that addresses all aspects of remote user management

In the modern workforce, remote and hybrid work environments have become the norm, making it essential for organizations to provide a seamless and optimized user experience.

To address this need, we present a comprehensive solution combining Liquidware™ Stratusphere™ UX and 10ZiG®. This integrated approach ensures that IT teams can manage, monitor, and enhance the remote user experience efficiently and effectively.

"*The integration and partnership with 10ZiG provides customers with a comprehensive user experience and metrics, all the way from the hypervisor to the end point. Combining user experience monitoring, secure, high-performance 10ZiG endpoints and centralized management via 10ZiG Manager means you can deliver exceptional DEX*".

Jason E. Smith - Liquidware
VP of Alliances and Product Marketing

Integrated Solution
Enhanced User Experience & Management

User Experience Monitoring
Stratusphere UX offers comprehensive visibility into user sessions and performance metrics, enabling proactive management of the remote user experience.
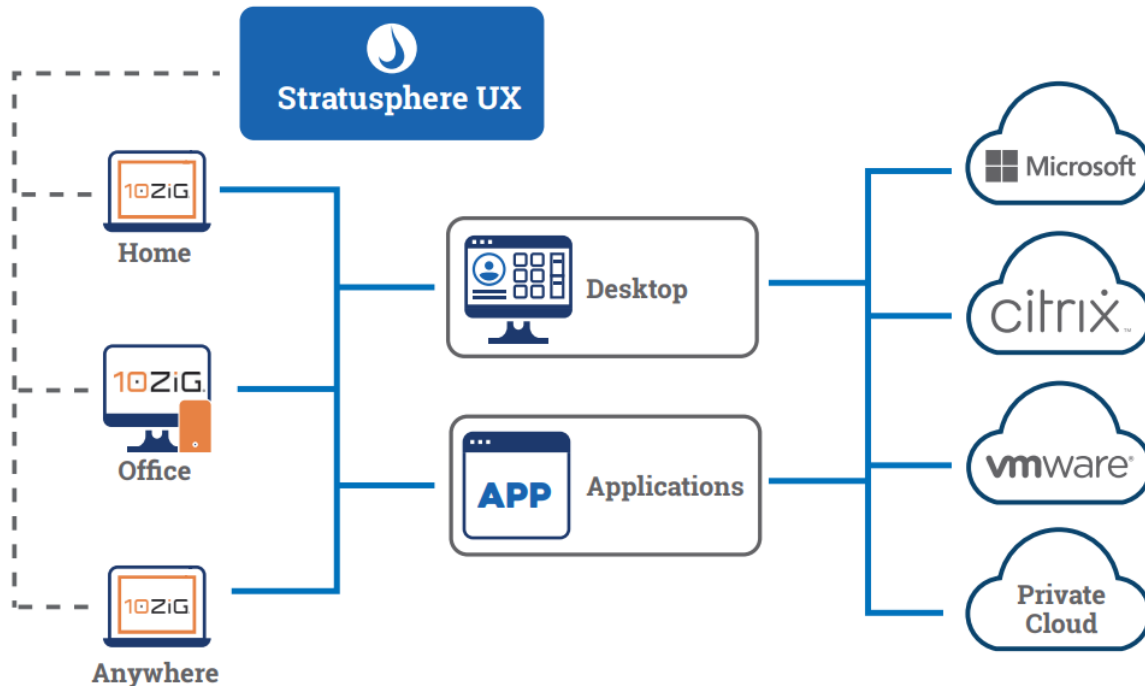

High-Performance Endpoints
10ZiG delivers secure and reliable endpoint solutions, including Thin Clients, Zero Clients & PC Repurposing that ensure a smooth and responsive UX in any environment.

Centralized Management
10ZiG Manager simplifies endpoint management, allowing IT teams to efficiently rollout, monitor and maintain devices whilst being intuitive and feature rich.

Enhanced User Experience & Management

Through this partnership, Liquidware and 10ZiG are setting new benchmarks for digital workspace performance, ensuring that businesses can leverage their IT infrastructure for optimal user engagement and productivity. This solution empowers organizations to maintain superior digital workspace experiences, critical for success in today's fast-paced, technology-driven environments.

Stratusphere UX
Comprehensive User Experience Management

Liquidware Stratusphere UX is a leading solution for monitoring and managing user experience in virtual, physical, and cloud environments. Its key features include:

End-to-End Visibility:
Stratusphere UX provides deep visibility into user sessions, applications, and the overall desktop environment including the 10ZiG performance, enabling IT teams to identify and address performance bottlenecks.

User Experience Metrics:
It collects and analyzes a wide range of user experience metrics, including login times, application launch times, and network latency, helping to pinpoint issues that affect productivity.

Deep Inspection Tools:
Stratusphere UX offers powerful diagnostic tools to troubleshoot and resolve user experience issues, ensuring minimal disruption to the end-user.

By leveraging Stratusphere UX, organizations can proactively manage and optimize the remote user experience, ensuring that employees have the tools and resources they need to remain productive and satisfied.

10ZiG Technology
Robust Endpoint Management and Performance

10ZiG enhances the solution by providing high-performance endpoints and comprehensive management capabilities. Its notable features include:

High-Performance Endpoints:
10ZiG offers a range of thin and zero clients that deliver exceptional performance and reliability, ensuring a smooth user experience in remote and virtual desktop environments.

Centralized Management:
The 10ZiG Manager, a centralized management console, allows IT administrators to easily configure, update, and monitor endpoints, streamlining device management and reducing administrative overhead.

Flexible Deployment Options:
10ZiG supports various deployment scenarios, including on-premises, cloud, and hybrid environments, providing flexibility to meet the unique needs of any organization.

> *"In today's distributed workforce, the end user experience is now more important than ever before. 10ZiG's partnership with Liquidware creates the synergy to provide customers with an unparalleled view into the entire VDI ecosystem. From endpoint management through the transport connection and into the hypervisor, the combination of Stratusphere UX and the 10ZiG Manager provide optimal performance regardless of the workload or location".*
>
> *Ed Richardson - 10ZiG*
> *Head of Technical Services*

With 10ZiG, organizations can ensure that their endpoints are optimized for performance and managed efficiently, contributing to a better overall user experience.

Conclusion

In today's remote and hybrid work environments, providing an optimized user experience is critical for maintaining productivity and employee satisfaction. The integrated solution of Liquidware Stratusphere UX and 10ZiG ensures that organizations can manage, monitor, and enhance the remote user experience effectively. This powerful combination delivers deep visibility into user performance, robust endpoint management, and high-performance devices, making it the ideal choice for organizations looking to optimize their remote work environments.
