

Leostream & 10ZiG:

Leostream allows for true freedom of choice when delivering access to remote desktops with a low-cost alternative to traditional VDI platforms. Partnering with 10ZiG adds secure, managed endpoint solutions that include Thin/Zero Clients & PC Repurposing.

They say that in life, change is inevitable, and in business, change is vital. The EUC landscape over the past twelve to eighteen months has made this realization come sooner than expected for lots of organizations. Many of these businesses are now looking for new ways to deliver desktops and applications at a lower-cost, without compromising on performance, security, reliability and ease of management...

Step forwards Leostream & 10ZiG Technology. The perfect combination of virtual desktops platforms and endpoint solutions that allows all of the above plus extreme flexibility.

“Modern organizations need to capitalize on their investments while evolving as technologies change. The combination of Leostream and 10ZiG provides a unique and powerful solution for doing just that, with the added bonus of being simple to deploy, easy to manage, and seamless for the end-user”.

*Karen Gondoly - CEO
Leostream*

Introducing Leostream

At Leostream, we take great pride in knowing that we are the world's premier and most comprehensive Remote Desktop Access Platform. This is because we believe everyone deserves a seamless work-from-anywhere environment, regardless of industry, size, or location.

With the Leostream platform, it all starts with insight paired with simplicity. Powered by a single-pane-of-glass admin console, our platform simplifies the management of users, cloud desktops, and IT assets—all with real-time dashboard access to view usage and environment details, helping to make informed decisions.

At Leostream, we are committed to helping organizations modernize their workforce and embrace the power of remote work.

Connecting People. Connecting Business.

Connecting People. Connecting Business.

Leostream is here to make connecting people and business initiatives seamless and easy. Our renowned Remote Desktop Access Platform enables IT professionals to connect their organization's workforce—providing seamless work-from-anywhere flexibility while maintaining workforce efficiency, constant visibility of users, security, costs, and provisioning through a single-pane-of-glass. No more headaches, no more hassles. And, whether you're supporting 25, 250, or 2,500+ users, Leostream can scale across your organization to provide the highest level of availability.

Simple Configuration

Configure your business rules once—your configurations are automatically applied to new desktops and users. Better yet, Leostream manages user-to-resource assignments and connections from wherever your users roam, using whatever display protocol works best for their purpose.level of availability.

Secure Remote Access

Allow your users to connect to anything, anywhere, anytime, and from any device, quickly and securely—all through our highly-granular access controls designed for managing and authenticating end-user connections. And when required, our audit-level logging provides comprehensive tracking of all access and usage.

Freedom Of Choice Environment

Build your environment to your exact needs, all while using best-in-breed technology without locking yourself into a single technology solution.

Intuitive End-User Interface.

Our modern web-based UI is the centralized hub for all end-user remote resources—all designed to be highly intuitive for quick and easy access.

Single-Pane-of-Glass.

Gone are the days of multiple portals and interfaces. Now, you can manage your entire on-prem, edge, and cloud desktop environment from your single-pane-of-glass administrator portal.

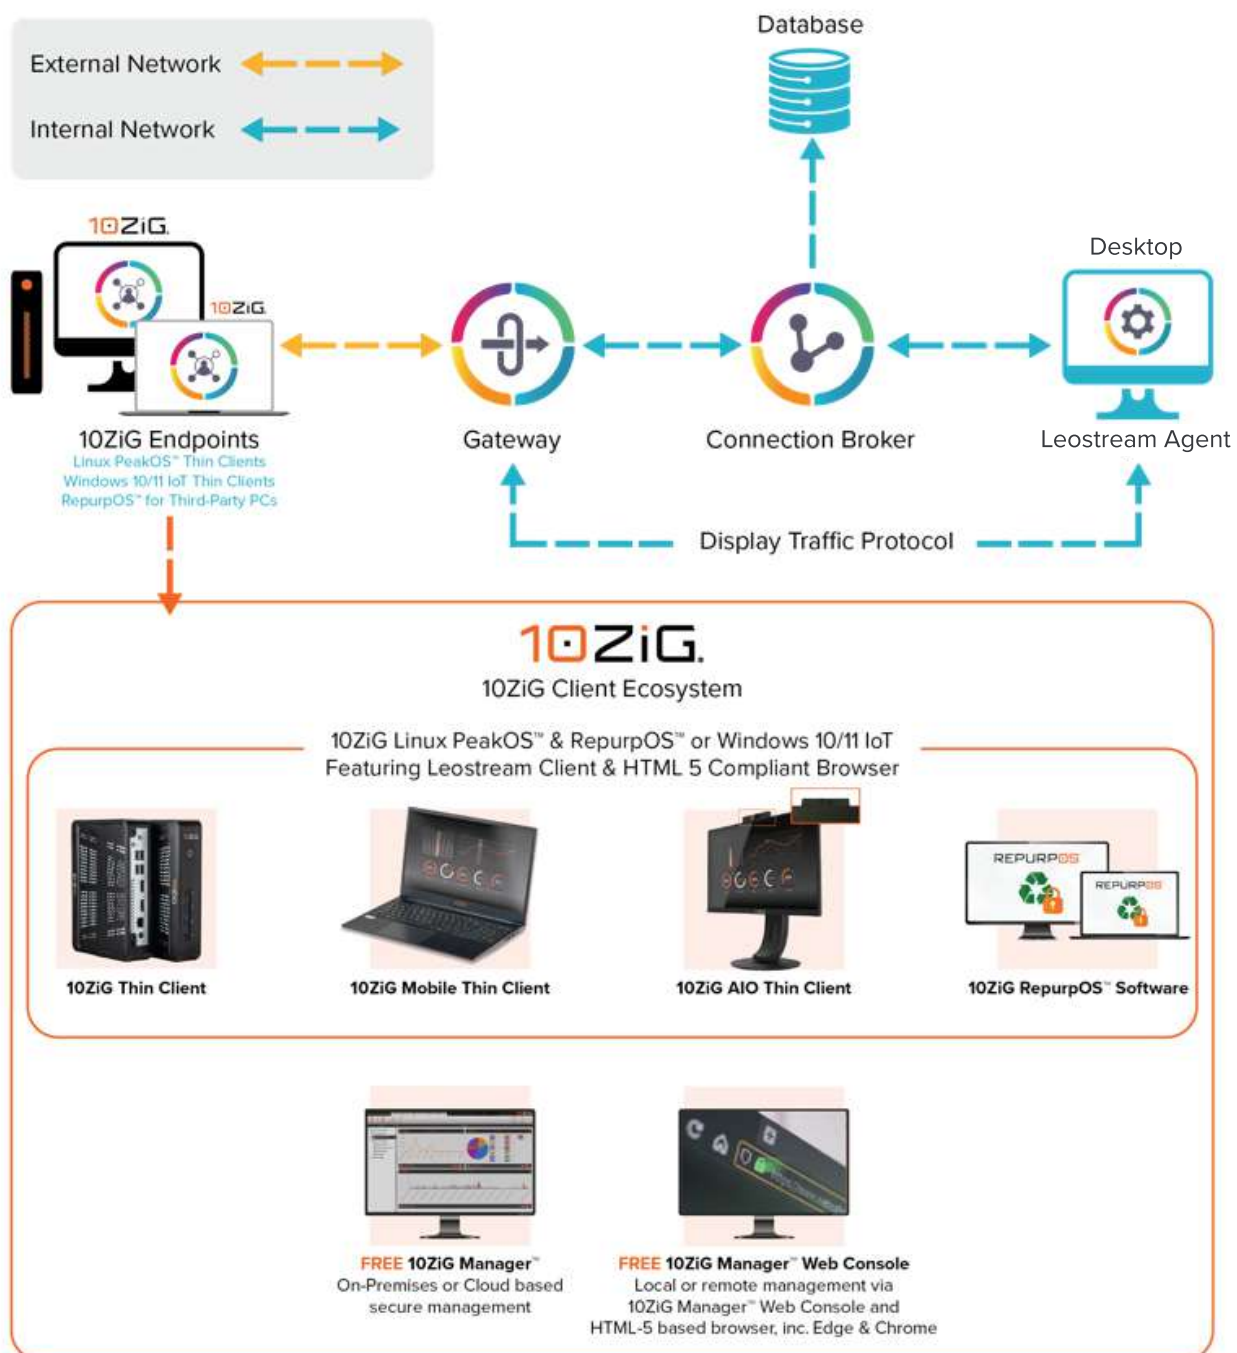

Choice of 10ZiG Operating Systems.

With Leostream, users can choose any 10ZiG OS they want including NOS (Linux Zero Client), PeakOS (Linux Thin Client) & Windows 11 IoT LTSC.

How Does 10ZiG & Leostream Work Together?

10ZiG supports the Leostream Connect client on both our Linux based & Windows IoT based Operating Systems. This includes PeakOS™ (Linux Thin Client OS), RepurpOS™ (10ZiG Linux PC Repurposing) & Windows 11 IoT LTSC. This means you can experience secure, reliable and standardized access to the Leostream platform via 10ZiG OSs on physical 10ZiG hardware or third-party PCs/Laptops/Thin Clients.

The Flexibility of Leostream, Meets The Flexibility of 10ZiG

The beauty of the Leostream Platform is that you are not tied down to one VDI stack, and you can choose what you connect to, where you connect to it from and all from one secure, seamless work-from anywhere environment. The confines of the traditional office are a thing of the past, so not only is Leostream breaking down the barriers of the physical office and assisting with hybrid and remote working, but it also allows for an unlimited geographical approach to supporting and hiring new employees and getting them connected.

When paired with 10ZiG, the opportunity to deliver that flexibility increases greatly as you can now run that Leostream experience via a single-vendor endpoint approach that covers hardware and software. Whether you plan to use **10ZiG Thin Clients** to access Leostream, repurpose existing x86 IT assets with **10ZiG RepurpOS™**, or a hybrid of the two - you now have a standardized endpoint strategy that from both a Leostream and 10ZiG POV, is agnostic to the physical location of the workforce (home/office/hybrid), or their geographical location. What's more, you can also manage all of your 10ZiG endpoints with the **100% FREE 10ZiG Manager™**.

10ZiG Solutions for Leostream

Secure, Managed Endpoint Hardware

10ZiG Linux & Windows 11 IoT LTSC available on traditional form factor, laptop and all-in-one.

Secure, PC Repurposing

Lightweight, secure Linux Thin Client OS to deliver the same UX on third-party hardware as with physical 10ZiG hardware.

FREE Centralized Management

Intuitive automated deployment, Scheduled Tasks & Role Based Access

"We are excited to showcase the huge benefits of the 10ZiG & Leostream Technology Alliance and allow our mutual customers to reap the rewards of secure, intuitive and seamless access to their VDI environment via the Leostream Platform from 10ZiG hardware and software endpoint solutions. Anywhere, anytime, any device".
