

10ZiG

10ZiG Manager™

FREE Endpoint Management Software

10ZiG Manager is fully free, easy-to-use endpoint management software provided to all 10ZiG customers using Linux- and Windows- based Thin Clients, as well as 10ZiG NOS™ Zero Clients running on Omnisia, Citrix, Microsoft, etc., platforms. 10ZiG Manager provides IT admins the choice of managing endpoints via traditional LAN/ WAN or cloud, using either our Desktop console or our Web Console; both platforms come with a variety of features that make managing large volumes of endpoints a breeze, regardless of your location.

Features of 10ZiG Manager:

Cloud Ready

10ZiG Manager supports cloud enablement, 10ZiG Thin Clients (Linux & Windows) and NOS™ Zero Clients to be managed, configured, and shadowed over the internet and cloud. The 10ZiG Manager Secure Connector can be installed on-premises and via cloud service of choice, including Amazon, Azure, Google, etc.

Role Based Access

With granular access permissions, the Role Based Access tool allows admins to configure Role(s) based on user- and group-based access. This includes inheritance of Active Directory based Groups and Users. User and Group based Role(s) can be assigned specific privileges, including general access, configuration changes, shadowing, firmware updates, and more.

Automatic Configuration & Firmware Versioning

10ZiG endpoints can be automatically configured and updated based on group membership. As 10ZiG endpoints are filtered into groups and where applicable, a preconfigured Configuration Template (comprising of common settings (Broker URL/Timezone/Keyboard Language/SSL certificates) and/or Firmware version is deployed to the 10ZiG endpoint. This makes configuration truly centralized and for ease of deployment and updating.

Amazon Workspaces | Apporto | Azure Virtual Desktop | Citrix | ControlUp | Dizzion Frame | Everfox | FabulaTech | Anyware | Inuvika | Imprivata | Leostream | Liquidware | Microsoft (AVD / RDS / W365) | Nerdio | Nutanix | Omnisia | Parallels | 90Meter

Distributed Firmware Versioning (DFV)

This allows remote endpoints to host their firmware package files for other Clients on the same network. The benefits include reduced server file hosting load as well as reduced bandwidth demand between the Manager Server network and remote sites when upgrading firmware.

Shadowing

10ZiG endpoints can be shadowed via 10ZiG Manager, allowing admins and technicians to troubleshoot and assist user sessions. In addition, shadowing options can be tailored to suit, including password enablement and user prompting of session access. Where the 10ZiG Manager Secure Connector is used, shadowing is tunneled securely via SSL, ensuring that all communication is safe and secure.

Power Management & Schedule Tasks

Admins can create scheduled tasks for maintenance actions through either management console, such as: Shutdown, Reboot, Wake-On-LAN, update firmware, apply Configuration and Resetting to factory default. Each scheduled task can be one time, interval, daily or weekly. This allows users to easily schedule maintenance outside of normal working hours.

Reporting

The Desktop Console provides in-depth reporting, while the Web Console provides helpful visual feedback through the use of colorful graphs. These types of reports include Thin Client - Name, Firmware, Status, and MAC Addresses. Additionally, the Web Console Summary can generate PDF documents which are downloaded to the user.

10ZiG Manager Server	Minimum	Recommended
Operating System	Windows 10 Enterprise 64 Bit	Windows Server 2022 Standard or higher
CPU	Dual Core 1.5Ghz	Quad Core 2.5Ghz
System Memory	2GB	4GB
Drive Space	8GB	20GB
10ZiG Secure Connector	Minimum	Recommended
Operating System	Windows 10 Enterprise 64 Bit	Windows Server 2022 Standard or higher
CPU	Dual Core 1.5Ghz	Quad Core 2.5Ghz
System Memory	2GB	4GB
Drive Space	2GB	2GB
10ZiG Web Console	Minimum	Recommended
Operating System	Windows 10 Enterprise 64 Bit	Windows Server 2022 Standard or higher
IIS Server	IIS 7	IIS 8
CPU	Dual Core 1.5Ghz	Quad Core 2.5Ghz
System Memory	2GB	4GB
Drive Space	2GB	2GB
