

10ZiG®

Why 10ZiG?

Single-Vendor Hardware & Software Solutions

Modernized Thin & Zero Clients for VDI, DaaS, & Web Apps **Standardized Endpoint OS | No-Hassle Repurposing | FREE Management**

10ZiG Technology's 20+ year sole focus on intuitive, secure, and cost-effective endpoint solutions, including hardware, operating systems, repurposing software, and endpoint management, is changing the game for endpoint delivery in VDI, DaaS, & Web App environments. Leveraged by longstanding partnerships with Omnisia, Citrix, Microsoft, AVD/W365/RDP, Amazon WorkSpaces, and more, 10ZiG offers a diverse selection of traditional, mobile, and all-in-one endpoints that support organizations of any size with endpoint delivery strategy. The beauty of 10ZiG solutions lies in its simplicity – simple to deploy, simple to configure, and simple to manage. With an end-to-endpoint solution stack of Thin & Zero Client hardware & software, repurposing software, free centralized management, local support, a fast-moving R&D team, plus an industry-leading product warranty, 10ZiG has everything you need to optimize your environment.

Single Vendor Strategy:

10ZiG is a dedicated Thin & Zero client provider, designing both hardware and software that work in complete harmony. With both simplified hardware and software features, there's no finger-pointing, as one team is supporting the entire stack. 10ZiG's sole focus and dedication to Thin & Zero client endpoints results in purpose-built solutions specifically engineered for VDI, DaaS, & Web Apps. Customers enjoy lower total cost of ownership by consolidating procurement, support, and management, all with one single vendor.

Hardware Endpoints:

10ZiG offers an extensive line of Thin & Zero Client endpoint hardware, equipped with industry-leading Intel or AMD processors, allowing for high performance and results. With TAA Compliance and options including Fiber, wireless, DisplayPort, HDMI and more, 10ZiG has traditional standalone, laptop, and all-in-one hardware options, along with an array of additional unique display and connectivity choices. 10ZiG truly is the secure, flexible, managed solution for today's diverse IT requirements.

Operating Systems:

10ZiG provides in-house developed secure Linux OSs – NOS™ (Zero Client), PeakOS™ (Linux Thin Client), and the additional option of Windows 11 IoT. 10ZiG Thin & Zero Clients also support all major VDI brokers and the latest protocols, including Blast Extreme, PCoIP, Citrix ICA/EDT (HDX), RDP, and a variety of published and locally installed applications such as Mozilla Firefox, Google Chrome, as well as provide support for a wide range of third-party solutions such as Imprivata, ControlUp, Liquidware, 90Meter, Fabulatech, and more.

Amazon Workspaces | Apporto | Azure Virtual Desktop | Citrix | ControlUp | Dizzion Frame | Everfox | FabulaTech | Anyware | Inuvika | Imprivata | Leostream | Liquidware | Microsoft (AVD / RDS / W365) | Nerdio | Nutanix | Omnisia | Parallels | 90Meter

Why 10ZiG?

Single-Vendor Hardware & Software Solutions

No-Hassle Repurposing Software:

Unlock the potential of your existing hardware with RepurpOS™, 10ZiG's Thin Client OS designed with security, standardization, and sustainability in mind. 10ZiG RepurpOS™ breathes new life into third-party PCs, laptops, and thin clients, transforming them into secure, dedicated Linux endpoints for VDI, DaaS, & Web Apps. 10ZiG RepurpOS™ allows the same standardized experience as with native 10ZiG hardware and can be managed simultaneously via the 10ZiG Manager.

FREE Centralized Management Software:

Simplified, secure, and intuitive, 10ZiG Manager™ is included completely free of charge with no user, license or device limit, unlike competitors that charge a license fee and ongoing support costs. 10ZiG Manager™ provides centralized management via Cloud, LAN, or WAN using a secure browser-based console for enabling automatic configuration, ongoing configuration, and OS package management, scheduling of tasks, shadowing, reporting, and more for all 10ZiG NOS™ (Zero), PeakOS™ (Linux), and Windows based Thin Client devices.

Top-Quality Support:

With local, certified tech support in USA & EMEA, depending on where you are based, 10ZiG exceeds pre-and-post sales support expectations. With competitors busy supporting thousands of product lines, the time to get help or answers becomes lengthy and frustrating. At 10ZiG, we answer and resolve issues quickly. Additionally, 10ZiG offers Windows customization, image pre-loading, custom development, and plenty more, providing an unmatched level of personalized support.

Fast-Moving Development:

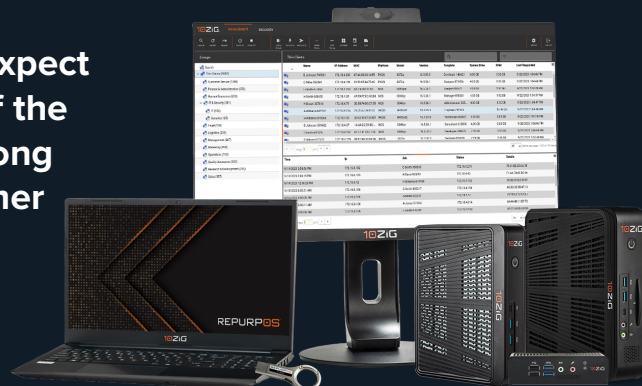

Our in-house R&D group provides truly unique product excellence, enabling us to quickly turn around software updates, providing customers with swift releases of new client versions featuring enhancements, customization, security updates and more. We focus on informing customers of such updates, preventing missed deployment deadlines, or being stuck in old VDI environments. Along with these timely updates, 10ZiG closely follows the release roadmaps of leading VDI providers and can also deliver support today's key communication platforms like Microsoft Team, Zoom, as well as DEX (Digital Employee Experience), Security Agents, and more.

Exceptional Warranty:

10ZiG includes a comprehensive Three (3) Year hardware warranty as standard on our desktop Thin & Zero Client devices, backed by dedicated technical support and ongoing firmware updates. Our goal is to provide reliable, long-term endpoint solutions while making support as straightforward as possible for IT Admins and end users. The 10ZiG guarantee is to adapt to your VDI environment, not the other way around.

As a 10ZiG customer, you can expect an unsurpassed combination of the most advanced feature sets, along with the highest level of customer support that competitors just cannot even come close to matching.
